

Position: Business Analyst-Intelligence: IMMEDIATE HIRE

Primary Location: Pope AFB, NC

Must be a U.S citizen

Security Clearance: TS with ability to gain SCI

Job Summary

The contractor will provide business analysis and develop proposals to support organizational requirements and provide support for developing, managing, and employing signature reduction plans, business plans, and mechanisms relevant to organizational requirements. He or she will act as advisor for the implementation of signature reduction plans into overall mission planning, with an understanding of how commercial business practices influence planning factors. The contractor shall stay abreast of current international affairs, with special emphasis on global friction points, intelligence and security, economic factors, commercial business, and operational matters. The contractor will advise the team leader in the use of signature reduction and commercial business plans in the conduct of specialized missions. The contractor shall plan, organize, and conduct analytical studies, develop nationally significant plans, policies, and formulate strategy and future concepts for USG forces involved in operations. The contractor shall provide analysis to support organizations within the enterprise for identification of business requirements, regulations, laws, and best practices. The contractor shall assist in the identification and analysis of data supporting operational requirements. The contractor shall routinely apply a thorough knowledge of diverse operational missions and capabilities. The contractor shall support continuing liaison with representatives of other military commands, US and foreign government agencies, and associated partners. The contractor shall provide information to support or refute complex operational decision making, based upon changing international or interagency roles, complex relationships, controversial issues, and national priority missions.

Key Attributes and Experience Required

Business Analyst Experience

The contractor shall possess knowledge of commercial business analytics to include, but not limited to, international strategies, techniques and tools, via a minimum of 5 years' experience managing projects within a full development life-cycle. The contractor must have a Bachelor's degree in a business related discipline and/or the requisite on-the-job experience in this area.

Intelligence Expertise

The contractor shall possess knowledge of mission, organization, and interrelationships of Department of Defense (DoD), Joint Staff, and interagency working groups. Experience analyzing complex data and intelligence products. Knowledge and/or experience in signature

reduction is preferred.

Special Operations Policy and Doctrine Experience

The contractor shall possess detailed knowledge of national policies and doctrine concerning special and unit operations in order to develop, coordinate, and assist in the implementation of operational plans and policies.

Data Research and Synthesis Expertise

The Contractor shall possess the ability to independently conduct research, compile, interpret, and analyze a wide variety of practical and technical data from a myriad of sources. The contractor shall be able to draw conclusions, present interpretations of the data, explain its meaning, and devise practical recommendations for action.

Communication Skills

The Contractor shall possess the ability to communicate effectively both orally and in writing.

Capabilities

The Contractor shall possess the ability to solve complex analytical problems. Proven proficiency in Microsoft Office products (Excel, Access, PowerPoint, and Word) is required.

Travel

- May be required to travel OCONUS to conduct training.
- Domestic travel may be required for training and program coordination
